

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DYNASTY GLOBAL CONVERTIBLES, a Sub-Fund of DYNASTY SICAV (Class A USD) – LU1280365559

This fund is managed by Dynasty AM S.A.

Objectives and Investment Policy

The objective of the Class A USD shares of "Dynasty Global Convertibles" (the "Sub-Fund") is to achieve long-term capital growth by investing mainly in convertible bonds.

The Sub-Fund is actively managed and is not managed in reference to a benchmark but uses the Thomson Reuters Global Focus Convertible Bond Index as a performance measure. The Sub-Fund does not offer any form of guarantee with respect to investment performance and no form of capital protection.

The investment policy of the Sub-Fund consists in holding a portfolio of mainly convertible bonds or similar fixed income instruments (60% minimum), standard non-convertible bonds (40% maximum), equities (as a result (or not) of the conversion of convertible bonds or similar fixed income instruments), warrants, futures, listed options and OTC derivatives.

The Sub-Fund will not invest in contingent convertible bonds ("Cocos").

The securities are issued by International issuers with 30% of issuers at least being outside Europe. The securities may be denominated in any currency.

Investments in instruments qualifying as distressed securities at the time of purchase are limited to 10% of the Sub-Fund's net assets.

Standard bonds as well as convertible bonds will not have a minimum rating at the time of their acquisition. Exposure to High Yield or unrated bonds will therefore be possible up to 100% of the net assets of the Sub-Fund.

The equity sensitivity (delta) of the Sub-Fund can range from 0% to 100%.

Derivatives may be used in the context of hedging the Sub-Fund assets against the interest rate risk, the equity risk, the foreign exchange risk and the volatility risk. The commitment resulting from such transactions and contracts may not exceed the Sub-Funds' assets.

The selection of convertibles will essentially depend on maximizing the risk-reward profile.

The Management Company relies on its own credit analysis to assess the credit quality of the fixed income securities.

The Sub-Fund is managed with reference to environmental, social and governance (ESG) factors and promotes environmental and/or social characteristics. Further information on the Sub-Fund's ESG strategy can be found in the prospectus).

The income of the Class A USD Shares is reinvested The Class A USD share is denominated in USD and hedged against foreign exchange risk of the USD versus the EUR.

The investor can obtain redemption of his shares on a simple demand transmitted by 4 p.m. two Luxembourg business days before each valuation day to the register and transfer agent. Orders are executed on the basis of the NAV calculated on the relevant valuation day. Settlement will occur one business day after the relevant valuation day.

Risk and reward profile

The exposure to "high yield" and non-rated convertible bonds explains the ranking of the Sub-Fund in the level 4 category.

The historical data used to calculate the composite indicator, may not be a reliable indication of the future risk profile of the Sub-Fund.

The fund's capital is not guaranteed.

It is possible that the category of risk and return displayed above does not remain unchanged.

The classification of the Sub-Fund is therefore likely to evolve over time.

The first category 1 in the table above does not mean the investment is risk-free.

Risks to which the Sub-Fund may be exposed, and to which the indicator gives too little consideration which could lead to a fall in the net asset value:

Credit risk: It represents the risk of the sudden deterioration in the credit quality of an issuer or its default. This risk is amplified by investments in speculative securities which ratings are low or nonexistent.

Liquidity risk: The Sub-Fund invests in markets that can be affected by lower liquidity under abnormal market conditions. These market conditions can impact the prices at which the fund manager buys or sells securities.

Convertible securities risk: The convertible bond market value tends to reflect the market price of the common stock of the issuing company when that stock price approaches or is greater than the conversion price of the convertible security.

Sustainability risk: ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Management Company may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of a Sub-Fund.

For more information about the risks you may face when investing in this Fund, please refer to the sections "Risk Factors" and "Details of each Sub-Fund" of the prospectus.

Charges

The charges paid cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of the investment.
