

Dynasty Euro Yield

30 December 2022

Investment Objectives

The objective of the Sub-Fund is to provide positive returns over the short term, through the selection of a portfolio of fixed income asset classes, markets and fixed income financial instruments offering an attractive yield considering the issuer's credit risk.

Market Comment

Despite the new slowdown in inflation in the United States, risk aversion has resurfaced at the end of the year following the speeches of central banks (FED, ECB, BoJ). The month of December was also marked by the abandonment of the zero covid policy in China, giving investors a glimpse of the emergence of the famous "Chinese awakening".

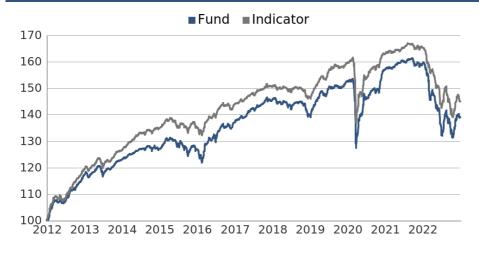

The class B (EUR) share of Dynasty Euro Yield posted a performance of -0.4% in December, outperforming its benchmark index over the same period (-1.1% for the 50% iBoxx euro corporate, 50% Markit iBoxx EUR High Yield Main).

During the month of December, we initiated a new position on Holcim 3% Perp (Call 2024), with a yield of 5.2%.

The average YTM of investments is at +7.7%. The average credit sensitivity is 2.7 with an average rating of **BB-**. The fund is invested through **51** positions.
