This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DYNASTY EURO YIELD, a Sub-Fund of DYNASTY SICAV (Class B EUR) – LU2360090091

This fund is managed by Dynasty AM S.A.

Objectives and Investment Policy

The objective of the Class B EUR shares of "Dynasty Euro Yield" (the "Sub-Fund") is to provide positive returns over the medium term, through the selection of a portfolio of fixed income asset classes, markets and fixed income financial instruments offering an attractive yield considering the issuer's credit risk.

The Sub-Fund is actively managed and is not managed in reference to a benchmark.

The Sub-Fund does not offer any form of guarantee with respect to investment performance and no form of capital protection applies.

The investment policy of the Sub-Fund consists in holding a portfolio of corporate fixed-income securities. Such securities will have, at the time of their acquisition, an attractive yield, taking into account the creditworthiness of their issuer.

The Sub-Fund's average interest rate sensitivity (duration) will range between 0 to 8 years.

The Sub-Fund will invest up to one hundred percent (100%) of its net assets in fixed-income securities such as standard bonds but also convertible bonds or similar fixed income instruments and Money Market Instruments including Negotiable Debt Instruments (NDI).

The Sub-Fund may invest up to 20% of its net assets in perpetual bonds, futures, listed options and OTC derivatives.

The fixed-income securities are only denominated in euros and issued by International (both European and Non-European) issuers.

Securities may have no minimum rating at the time of their acquisition. Investments in High Yield or non-rated securities will therefore be possible up to 100% of the net assets of the Sub-Fund.

Investments in instruments qualifying as distressed securities at the time of purchase are limited to 10% of the Sub-Fund's net assets.

The Sub-Fund may invest up to 10% of its net assets in contingent convertible bonds ("Cocos").

The average equity sensitivity (delta) of the Sub-Fund from its exposure to Convertible bonds will be below 10%.

Derivatives instruments may only be used in the context of hedging the Sub-Fund's assets against the interest and credit risk. The commitment resulting from such transactions and contracts may not exceed the Sub-Fund's assets.

The selection of fixed income instruments will essentially depend on the analysis of their issuer's creditworthiness, based on a thorough analysis of their solvability.

The Management Company relies on its own credit analysis to assess the credit quality of the fixed income securities.

The income of the Class B EUR Shares is reinvested. The Class B EUR share is denominated in EUR. The Class B EUR shares are offered only to Institutional Investors.

The investor can obtain redemption of his shares on a simple demand transmitted by 4 p.m. two Luxembourg business days before each valuation day to the register and transfer agent. Orders are executed on the basis of the NAV calculated on the relevant valuation day. Settlement will occur one business day after the relevant valuation day.

Risk and reward profile

Lower Risk ← Higher Risk
Typically lower reward Typically higher reward

The exposure to the "corporate bond market" (including speculative high yield bonds) explains the ranking of the Sub-Fund in the level 4 category.

The historical data used to calculate the composite indicator, may not be a reliable indication of the future risk profile of the Sub-Fund.

The Sub-Fund's capital is not guaranteed.

It is possible that the category of risk and return displayed above does not remain unchanged.

The classification of the Sub-Fund is therefore likely to evolve over time.

The first category 1 in the table above does not mean the investment is risk-free.

Risks to which the Sub-Fund may be exposed, and to which the indicator gives too little consideration which could lead to a fall in the net asset value:

Credit risk: It represents the risk of the sudden deterioration in the credit quality of an issuer or its default. This risk is amplified by investments in speculative securities which ratings are low or nonexistent.

Liquidity risk: The Sub-Fund invests in markets that can be affected by lower liquidity under abnormal market conditions. These market conditions can impact the prices at which the fund manager buys or sells securities.

For more information about the risks you may face when investing in this Fund, please refer to the sections "Risk Factors" and "Details of each Sub-Fund" of the prospectus.
