Why investing in convertibles ?

- An **attractive vehicle** to participate in equity upside by reducing volatility.
- A **reduced exposure to interest rate risk** compared to classic bonds with the same maturities.
- A historically **dynamic primary CB market** and well-diversified in terms of sectors, source of performance.
- Opportunities to play **takeover targets**.

Our portfolio

- A **pure convertible bond fund** (no synthetic CBs, no options, no structured products) in Europe.
- A limited number of positions mainly **High-Yield and Non-rated**.
- A flexible **average delta** (50% max.)
- **Conviction management approach** based on “**CB picking**” with a thorough credit analysis and reactivity to news flows.

Advantages of the fund

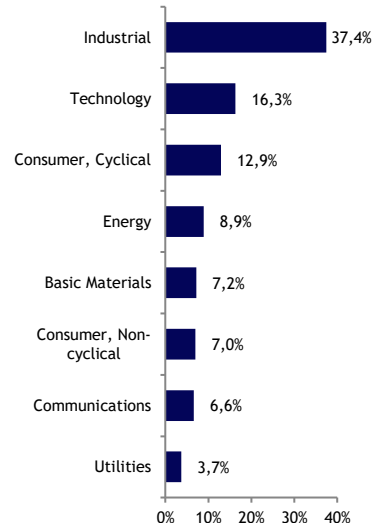

- Experienced portfolio managers on European convertible bonds: **10 Lipper Funds Awards** (over the past 14 years)
- **Looking for opportunities on the convertible bond universe** (European and of all types) via CB picking
- Risk diversification (ca. 50 convertibles)
- **Daily liquidity, no exit fee**

Risks and Rewards profile *

Lower Risk ← Higher Risk
 Typically Lower Reward → Typically Higher Reward

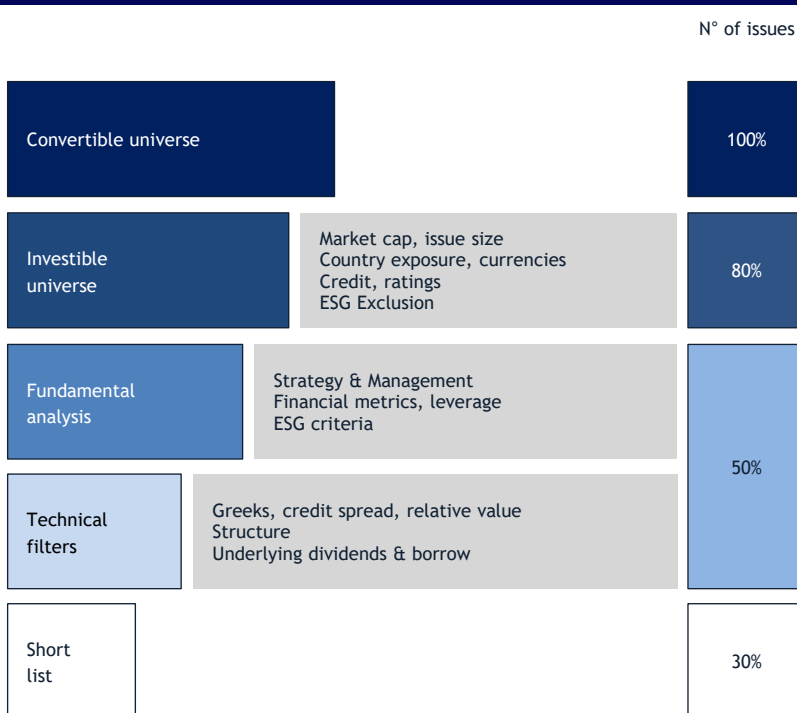

The fund's capital is not guaranteed.

Credit risk: This represents the risk of the sudden deterioration in the credit quality of an issuer or its default. This risk is amplified by investments in speculative securities whose ratings are low or nonexistent.

Liquidity risk: The fund invests in markets that can be affected by a lower liquidity. These market conditions could impact the prices at which the fund manager would be able to buy or sell securities

* You can find more information about the risk of the fund in the fund prospectus. The lowest category (1) in the table above does not mean the investment is risk-free. The risk rating of the fund may change in the future.
