DYNASTY CORPORATE BONDS 0-2.5, a Sub-Fund of DYNASTY SICAV (Class A EUR) – LU2133138276

This fund is managed by Dynasty AM S.A.

Objectives and Investment Policy

The objective of the Class A EUR shares of "Dynasty Corporate Bonds 0-2.5" (the "Sub-Fund") is to provide positive returns over the short term, through the selection of a portfolio of fixed income asset classes, markets and fixed income financial instruments offering an attractive yield considering the issuer's credit risk.

The Sub-Fund has no benchmark and is actively managed. The Sub-Fund does not offer any form of guarantee with respect to investment performance and no form of capital protection applies.

The investment policy of the Sub-Fund consists in holding a portfolio of corporate fixed-income securities. Such securities will have, at the time of their acquisition, an attractive yield, taking into account the creditworthiness of their issuer. The maturity or early reimbursement dates (put and/or call) of the fixed-income securities held in portfolio will not exceed 10 years.

The Sub-Fund's average credit duration will range between 0 and 2.5 years and the Sub-Fund's average interest rate duration range from 0 to 2.5 years.

The Sub-Fund will invest up to one hundred percent (100%) of its net assets in standard bonds but also convertible bonds or similar fixed income instruments.

The Sub-Fund may invest up to 10% of its net assets in perpetual bonds, futures, listed options and OTC derivatives.

The fixed-income securities are only denominated in euros (70% minimum) and mainly issued by European issuers (50% minimum). The balance, i.e. 30% maximum, can be denominated in hard currencies

other than the euro (USD, GBP, CHF, etc.), and up to 50% can be invested in bonds issued by international issuers (i.e. non-European).

Standard bonds as well as convertible bonds may have no minimum rating at the time of their acquisition. Exposure to High Yield or unrated bonds will therefore be possible up to 70% of the net assets of the Sub-Fund and at least 30% of the net assets of the Sub-Fund will be invested in investment grade bonds.

Investments in instruments qualifying as distressed securities at the time of purchase are limited to 10% of the Sub-Fund's net assets.

Derivatives instruments may only be used in the context of hedging the Sub-Fund's assets against the interest rate, credit and FX risk. The commitment resulting from such transactions and contracts may not exceed the Sub-Fund's assets.

The selection of fixed income instruments will essentially depend on the analysis of their issuer's creditworthiness, based on a thorough analysis of their solvability.

The Management Company relies on its own credit analysis to assess the credit quality of the fixed income securities.

The income of the Class A EUR Shares is reinvested. The Class A EUR share is denominated in EUR.

The investor can obtain redemption of his shares on a simple demand transmitted by 4 p.m. two Luxembourg business days before each valuation day to the register and transfer agent. Orders are executed on the basis of the NAV calculated on the relevant valuation day. Settlement will occur one business days after the relevant valuation day.

Risk and reward profile

The exposure to "high yield" and non-rated fixed income securities explains the ranking of the Sub-Fund in the level 2 category.

The historical data used to calculate the composite indicator, may not be a reliable indication of the future risk profile of the Fund.

The fund's capital is not guaranteed.

It is possible that the category of risk and return displayed above does not remain unchanged.

The classification of the Sub-Fund is therefore likely to evolve over time.

The first category 1 in the table above does not mean the investment is risk-free.

Risks to which the Sub-Fund may be exposed, and to which the indicator gives too little consideration which could lead to a fall in the net asset value:

Credit risk: It represents the risk of the sudden deterioration in the credit quality of an issuer or its default. This risk is amplified by investments in speculative securities which ratings are low or nonexistent.

Liquidity risk: The Sub-Fund invests in markets that can be affected by lower liquidity under abnormal market conditions. These market conditions can impact the prices at which the fund manager buys or sells securities.

Convertible securities risk: The convertible bond market value tends to reflect the market price of the common stock of the issuing company when that stock price approaches or is greater than the conversion price of the convertible security.

For more information about the risks you may face when investing in this Fund, please refer to the sections "Risk Factors" and "Details of each Sub-Fund" of the prospectus.

Charges

The charges paid cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of the investment.
