

Investment Objectives

The investment objective of the fund "**Dynasty Convertibles Europe**" is to achieve long term capital growth by investing mainly in convertible bonds.

Market Comment

In February, the exceptional season of annual corporate results contributed to a significant rise in global equity markets (+4.1% for the index during the month). These performances were driven notably by the technology sector (Nvidia reported a doubling of annual revenue) in the context of the development of artificial intelligence. Furthermore, geopolitical tensions in Ukraine and the Middle East do not appear to have significant impacts on the markets, while the Chinese economy continues to struggle to regain its momentum.

In this context, the B (EUR) share of the **Dynasty Convertibles Europe** fund delivered a **+2.9%** performance in February and since the beginning of the year.

During the month, we lightened our position in **BE Semiconductor 1.875% 2029** after a successful performance of the security.

Simultaneously, we sold our positions in **Neoen 2.875% 2027** and **Qiagen 0% 2027** due to a decrease in the attractiveness of these convertibles.

The delta of the fund stands at **37.0%** at the end of February. The fund is invested in **26** positions. Average credit sensitivity is **2.6**, with an average portfolio rating of **BBB-**. The average YTM of the fund stands at **1.5%**.
