

## Investment Objectives

The investment objective of the Sub-Fund “Dynasty Prestinvest Flexible” Income is to achieve long term capital growth by investing in a balanced portfolio, composed of mainly fixed income securities, and in a lesser extent of equities.

## Market Comment

In February, the exceptional season of annual corporate results contributed to a significant rise in global equity markets (+4.1% for the index during the month). These performances were driven notably by the technology sector (Nvidia reported a doubling of annual revenue) in the context of the development of artificial intelligence. Furthermore, geopolitical tensions in Ukraine and the Middle East do not appear to have significant impacts on the markets, while the Chinese economy continues to struggle to regain its momentum.

This new fund was launched on May 12, 2023. The performance of the class F (EUR) share of the **Dynasty Prestinvest Flexible Income** fund is up by +0.3% in February, thus +5.5% since its inception (19th April 2023).

At the end of February, **98.2%** of the portfolio is invested.

The average YTM of the fund stands at **4.2%**. The average credit sensitivity is **3.3** and the average rating is **BBB+**. The fund is invested through **76** positions.
